

Nine-capability coverage: ownership, dependencies and vendors

Management view for 30 September and year-end delivery

Capability	Velora covered by 30 Sep	Velora covered by year-end	Velora — other department to cover	Needs more clarity to cover	Protiviti	MeshX
C1 Enterprise data query	FULL — 6 SAP queries live	Expand via SAP BDC/ BTP + Foundry	Infra + SAP data owners: access/endpoints	Confirm priority year-end data products	Full — SAP + SharePoint/ OneLake	Foundation MCP; 3–5 questions
C2 Proactive recommendations	FULL — daily KPI scan	Broader signals and reusable skills	Business owners: approve KPIs/thresholds	Confirm future signals and trigger thresholds	Full — Foundry scheduled skill	Not covered
C3 Evaluation engine	FULL — covered internally	Deeper criteria and data models	Business owners: approve evaluation criteria	Confirm additional evaluation use cases	Full — Foundry evaluation skill	Not covered
C4 Briefing & synthesis	FULL — inbox briefs/digests	More sources and automation	Business/M365 owners: source access	Confirm new sources, formats and cadence	Full — cited Outlook/ Teams briefs	Not covered
C5 Agent creation	Covered — governed creation; controls manageable	Full self-service + edit/pause/retire	David/PMO: confirm scope interpretation	Clarify “without IT” and required lifecycle controls	Full — create/edit/ pause/retire	Not covered
C6 Institutional memory	FULL — documents/ transcripts searchable	Broader corpus and retention controls	Data/records owners: content + retention approval	Confirm additional corpus and retention policy	Full — AI Search/RAG	Not covered
C7 Meeting intelligence	FULL — Graph + action flows	Broader channels and automation	M365/Privacy owners: access + retention	Confirm non-Teams scope and privacy requirements	Full — Graph/manual upload	Not covered
C8 Peer benchmarking	PENDING — ADAA data/source required	Build once ADAA details and data are received	DAVID — obtain peer set, metrics and data from ADAA	ADAA-approved peers, source, metrics and format	Full — one approved source minimum	Not covered
C9 Decision traceability	Captured internally in Velora’s current format	Align final schema, CSV export and Purview	DAVID — provide ADAA evidence/export template	Official ADAA schema, fields and export format	Full — Dataverse + CSV evidence	Data lineage/audit portion only

MANAGEMENT VIEW

Velora covers C1–C7 internally. C8 depends on ADAA peer/data inputs; C9 is already logged internally but awaits David’s official ADAA evidence/export template.
